

Lear Communication One-on-One Technology Support Courses

Developed by Technology Consultant Tonya Lambert, CDA

Level 3 Program: Introduction, facilitation, and generalization of goal-specific apps and features based on the client's functional needs and goals

Cost: \$115.00 per session, minimum 3 sessions*

* Number of sessions will vary according to the range and type of apps being taught, the functional goals to be achieved, and the client's pace of learning

Features and Learning Included:

- Reinforcement of Level 1 and Level 2 skills
- Review of apps to target specific goals in areas such as:
 - Memory (e.g., setting reminders, using a visual journal, note taking supports)
 - Organization (e.g., scheduling, to do lists, categorizing notes, creating study notes)
 - Speech (e.g., speech generating devices, structured voice and articulation modeling)
 - Writing (e.g., mind mapping, essay organization, speech-to-text conversion, note taking)
 - Social Communication (e.g., instant messaging, emailing, skype/facetime, social skills apps)
 - Word Finding (e.g., word finding exercises through interactive apps)

Each Level 3 session should be scheduled within 10 days of the prior session in order to maximize learning (you will be asked to practice in between sessions 😊). Each session is 60 minutes in length.

Consultation to your regular therapist, if applicable, is included for no additional cost.

Sessions are conducted by our Communicative Disorders Assistants who are friendly, fun, tech-savvy - and also highly trained in cognitive and communication difficulties.

Sessions are provided 1:1 with the client and/or their caregiver.
